

DAIKIN

Since 1982, Muscat Electronics (ME) has been distributor of Daikin brand of air-conditioners. Daikin Industries Ltd., Japan was founded in 1924 and since has constantly been growing and developing to become a global leader in an array of fields. Daikin not only holds the largest market share of commercial-use air conditioning systems in Japan, but is also Global No.1 in air-conditioning. It is the world's sole manufacturer that combines research, development and manufacturing of air conditioning systems, refrigerants and compressors.

FIRST IN INNOVATION AND QUALITY

Daikin is able to look back on a history of innovation from the first packaged air-conditioners and heat pumps in the 1950s, to the first multi-split systems in the 1960s, to the invention of, the VRV® system (Variable Refrigerant Volume) in 1982 and its continued development since, the first to adopt and commercially produce R-32 refrigerant based split ACs, to mention a few.

Daikin has also been at the forefront of ultra-efficient inverter technology as well as the development of environment friendly and safer refrigerants. Using core technologies as basis, Daikin is able to produce innovative, energy efficient and space saving solutions.

Daikin has strived with strong passion to pursue solutions related to the air we live in. These technologies changed our customers' everyday life for the better. (Chronicle of Daikin's progress from founding in 1924.)

ENVIRONMENTAL LEADERSHIP

Air is essential to our existence; our role in protecting it continues to expand. Daikin has devoted itself with unbridled passion to overcome the ever-evolving challenges of air to become the leading manufacturer of air-conditioning equipment. Leveraging its unique cutting-edge technology, it delivers outstanding products and system solutions to ensure comfortable and sustainable living environment for all people and regions of the world.

PRODUCT RANGE

Daikin has strived with strong passion to pursue solutions related to the air we live in. Here, we introduce key technologies Daikin has developed. These technologies changed our customers' everyday life for the better. Daikin has become a total air-conditioning solution provider with products that match almost every requirement and budget. Daikin's concern for care and quality extends throughout all four pillars of business. Daikin's flagship products includes

- The FTD series- the deluxe range of wall-mount split ACs that is focused on providing homes with optimum comfort as well as air purification system. Daikin is also among the first to introduce wall-mount split ACs with R-410A and the first to adopt and commercially produce R-32 refrigerant based split ACs.

- The full range of Cassette, Ceiling suspended, Floor-standing and Ducted AC is offered under its SkyAirseries.

- Daikin offers a wide selection of Packaged ACs with R-410A refrigerant for mid-large sized buildings, also
- Daikin's innovative, eco-friendly, energy-efficient and the revolutionary VRV® systems are apt for tall, wide and large commercial buildings and equally for residential complexes and individual villas.
